

Ecology

In association with our partner company, Practical Ecology Ltd, Hayden's are able to provide a range of ecological services.

Practical Ecology Ltd work with a range of clients from large housing developers to architects, planners and private individuals and tailor their service on a project by project basis. Practical Ecology Ltd provide and implement pragmatic mitigation solutions and hope to minimise the risk of unforeseen programme delays and any subsequent costs.

Services include:

- Extended Phase 1 Habitat Surveys
- BREAAAM/Code for Sustainable Homes Assessments
- Protected species surveys (Great Crested Newt, bats, badgers, water vole etc.)
- Ecological mitigation
- Ecological Management Plans (EcMP)
- Ecological Clerk of Works (EcCW)
- Invasive weed surveys and mitigation

All reports are provided in an electronic format along with digitalised plans, produced by the CAD technicians at Hayden's, where required.
